American League Base Ball Players Get Strike Fever and May Take a Walk

New York, July 20.—Drastic action, possibly a strike or walkout of base ball players in the American League, is contemplated by the base ball players' fraternity, according to a statement by President Pultz, in case the National Commission refuses to accede to the terms of an ultimatum sent it by the players in the case of Player Kraft, of the Newark Internationals.

It was reported that the commission had been given until July 22 to reply to the players' demands.

In the event of an unfavorable or unsatisfactory reply Mr. Pultz said the players' fraternity would take "drastic action." Mr. Pultz was unwilling to say what the nature of this action would be.

John Deere's Self-Dump Sulky Rake

The First Consideration Has Been Simplicity and Durability!

DURABLE

Axle studs are 1 1/4 inches in diameter, and are reversible and interchangeable, which doubles their life.

Dump rods are of high carbon steel, 3/4 of an inch in diameter. They have four times the durability of the ordinary dump rod, as they are reversible individually, interchangeable and again reversible.

SIMPLICITY

We can rightfully boast that our rake has fewer parts than any rake on the market. Simplicity of construction and proper material, systematically and symmetrically distributed, mean much to users.

\$5,000,000 UNIVERSITY

Of the Methodist Episcopal Church, South to be Located at Atlanta.

(From Atlanta Journal)

Atlanta wins the great southeastern university of the Methodist Episcopal Church, South, the companion of the institution which has been located at Dallas, Texas.

Announcements of the victory was made at 10:30 o'clock Thursday morning from the educational commission's meeting in the Piedmont Hotel. Shortly after the announcement, Asa G. Candler gave out a typewritten statement verifying the report that he will give \$1,000,000 outright to the new university.

Mr. Candler's statement was a carbon copy of a letter addressed Thursday by him to his brother, Bishop Candler, chairman of the commission.

"Impelled by a deep sense of duty to God and an earnest desire to do good to my fellow men, I make to you as chairman, the communication which follows," was the first paragraph.

"To this end, so far as education can accomplish it, I offer to the educational commission, of the Methodist Episcopal Church, South, charged by the general conference with the duty of establishing an institution of university grade east of the Mississippi River, the sum of one million (\$1,000,000) dollars for the endowment of such an institution."

Mr. Candler's letter expressed fully the spirit which impelled him to make the generous gift.

It is planned as a \$5,000,000 institution. Its work will start this fall, with equipment already available to

the theological department. This and the Dallas university will have the support of the whole southern Methodist Church. The church has relinquished any further claim upon Vanderbilt University, and will turn its attention entirely to these.

Ohio is now suffering from "legislative indiges-
tion," the third session within eighteen months of
the Cox regime will bring on "legislative appendi-

It is reported from Chicago that the price of
beef to the butcher soon will be 16 cents. When
this comes true, as, doubtless, it will the Argentine
stock raiser will think he has found the pot of gold
at the end of President Wilson's rainbow.

ONLY 160,000 MAJORITY.
Senator Penrose of Pennsylvania, on Tuesday
"came back" triumphantly and the next one will
be Uncle Joe Cannon. Senator Cummins voted
against the low Tariff because he knew it would be
a failure and would want to get from under the
responsibility; but he was as much responsible for
the Democratic Tariff as President Wilson was, and
more. He started the outlandish fight on the Pro-
tective Tariff. Now the country is returning to
Republican Tariff ideas. Who will contend that
Senator Cummins is the sort of Tariff advocate to
lead the Republican party?

Senator Penrose's majority is 160,000 over his
Cummins type of statesman opponent. Is it sig-
nificant of the trend away from humbug and fake
"reform" that Pennsylvania in its first primary
should be so decisive for Protection to American
labor and industries?—Adair (In.) News.

LOUISIANA IS FIGHTING MAD.
The Bull Moose movement in Louisiana is Bull
Moose only for want of a better name. The name
Republican is still anathema in that part of the
world, although Pharr in 1896 was elected Gov-
ernor on a Republican-Independent ticket, despite
the fact that he was counted out.

Louisiana is "sore clean through." Is it any
wonder? The Democratic leaders imagined that
they had some sort of guarantee from the Balti-
more convention that the sugar interests would be
taken care of. They knew that Mr. Underwood was
against free sugar, and that they were given to under-
stand that Woodrow Wilson would be also. But
this did them no good; and when they began to feel
around in Washington recently, explaining that
the Progressive movement would win the day un-
less the sugar schedules were revised, they met with
a cold reception. The White House was against
them. South Louisiana may love Democracy, but
it loves its sugar cane better. The recently devel-
oped rice industry in western Louisiana has also
been hard hit.

For years Louisiana voted Democratic and prayed
for Republican success. This time it got what it
voted for and the dose is unseating.

There is no joy in the Choctaw Club these days.
An independent Governor sits in Baton Rouge. The
Bull Moose has been parading up and down with
every sign of enthusiastic popular support. One
Congressman anyway, and three others perhaps, is
what the Progressives expect to get. It is really
just an anti-Democratic fight, but there is enough
venom in it to satisfy the most ferocious politicians.
What Louisiana wants is a few Congressmen who
will vote for the interests of the State, that is, for
Protection; and it wants to get rid of the little fel-
lows who jump whenever the Big Chief happens to
crack his whip.—Philadelphia Public Ledger.

TOO FAST.
A very much mused-up citizen of the Sixth City rushed
into the Central Police Station Tuesday evening and shout-
ed aloud for vengeance, justice, or mercy at the very least.
"The automobile that hit me five minutes ago was No.
11141, Ohio," he spluttered. "It knocked me unconscious,
but I got the number before I went down for the count.
Put it on a piece of paper—11141."
"All right. What do you want?"
"What do I want? Why, I can prove that he was ex-
ceeding the speed limit, and I want—I want—"
"Calm down, friend. You want a warrant for his ar-
rest?"
"Warrant nothing! What good would a warrant do me?
He was going so fast, I tell you, that a warrant wouldn't
get him now. What I want is extradition papers!"—Cleve-
land Dealer.

ADVICE TO VACATIONISTS.
Stay, stay at home, my heart and rest.
Your Harlem flat do not detest,
For those who seek a change of scene,
Oft learn too late what these words
mean;
To stay at home is best.
Be not easily impressed
By "pamphlets sent upon request,"
In air-proof rooms you will be pent.
For which they'll charge you double
rent,
To stay at home is best.
Then stay at home, my heart, and rest—
Homekeeping hearts are happier,
Who falls for this vacation bait,
Him does the Demon Debt await,
To stay at home is best.

**MAXIE ALL THE RAGE IN BRIT-
ISH GUIANA JUNGLES.**
(Philadelphia Dispatch to the Chicago
Tribune.)
The maxie is all the rage among the
semi-civilized South American Indian
bellees, according to Dr. W. C. Fumher,
leader of the University of Pennsylva-
nia Amazon expedition, in a letter just
received.
From the jungle lands of Southern
British Guiana the explorer writes, stat-
ing he has seen the "masheka" as the
natives pronounce the word, and that
it is quite some dance, too.
The costume of the fair Indian mis-
trix consists of a small apron hung with
bracelets, anklets and peacock shells, he
says. These shells when agitated giv-
ing a pleasing rattle which is almost a
tinkle. These peacock shells are worn by
both sexes and the dance is one used in
courtship.
Literally "masheka" means peacock
vine dance and is so called because it
is supposed to imitate the graceful way-
ing of the peacock tendrils.

SEVERE PUNISHMENT
Of Mrs. Chappell, of Five Years'
Standing, Relieved by Cardui.

Mr. Airy, N. C.—Mrs. Sarah M. Chap-
pell of this town, says: "I suffered for
five years with womanly troubles, also
stomach troubles, and my punishment
was more than any one could tell.
I tried most every kind of medicine,
but none did me any good.
I read one day about Cardui, the wo-
man's tonic, and I decided to try it. I
had not taken but about six bottles until
I was almost cured. It did me more
good than all the other medicines I had
tried, put together.
My friends began asking me why I
looked so well, and I told them about
Cardui. Several are now taking it."
Do you, lady reader, suffer from any
of the ailments due to womanly trouble,
such as headache, backache, sideache,
sleeplessness, and that everlasting tired
feeling?
If so, let us urge you to give Cardui a
trial. We feel confident it will help you,
just as it has a million other women in
the past half century.
Begin taking Cardui to-day. You
won't regret it. All druggists.

A WORD WITH WOMEN
Valuable Advice for Maysville Readers.

Many a woman endures with noble
patience the daily misery of backache,
pains about the hips, blue, nervous
spells, dizziness and urinary disorders,
hopeless of relief because she doesn't
know what is the matter.
It is not true that every pain in the
back or hips is trouble "peculiar to the
sex." Often when the kidneys get
congested and inflamed, such aches and
pains follow.
You can tell it is kidney trouble if the
secretions are dark colored, contain
sediment, the passages are too fre-
quent or scanty. Then help the weak-
ened kidneys. Don't expect them to get
well alone.
Doan's Kidney Pills have won the
praise of thousands of women. They
are endorsed at home—Read this Mays-
ville woman's convincing statement:
"Mrs. Dora McEldred, Maysville, Ky.,
says: 'I had been feeling poorly for
some time, before I knew that my kid-
neys were at fault. I was nervous and
dizzy and my back and head ached. I
rested poorly and mornings I was all
tired out. I read in a local paper how
a neighbor had been cured of kidney
trouble by Doan's Kidney Pills. I used
them and before long I was a great deal
better. I was able to sleep well and
they improved my health.'

USE AUTOS IN HARVEST.

Early returns from the wheat-threshing fields indicate that the Nebraska winter wheat yield is about three times the normal amount, the yield running from thirty-five to forty bushels an acre. Threshing is under way in the entire southern tier of the country.
Many farmers are using automobiles instead of horses to draw harvesting machinery. In this way nearly 25 per cent. more grain can be cut than by horse power.

Prof. Richardson of Boston, blames women's dress and the modern dances for crime and insanity. Still, there was much crime and insanity before the present women's dress and dances appeared on the scene.

Notwithstanding her brilliant address on Women's Suffrage at the Chautauqua, Sunday afternoon, Mrs. Trout was just like any other woman Monday morning, irritated and "fussy." She was at the postoffice window before the hour of opening, seven o'clock, and fumed and fretted because she could not at once get her mail and "catch her train." She tapped on the window, wrung her hands a little, looked about as amiable as most women do on wash day, and when the window was opened, fretted a little more because she had to sign a receipt for a registered letter. Then she ran for the railroad station as fast as her fashionable skirts would allow—and waited forty minutes for the train. When the women get the ballot trains will be compelled to come in on time and wait until every woman gets her mail.

Starvation In The Midst Of Plenty

Many are actually starving, even though eating heartily three times a day. They are starving because the usual diet lacks certain essential elements.

In making white flour, the outer coat of the wheat, containing the phosphate of potash and other vital mineral salts, is discarded. These mineral salts are absolutely necessary to nerve health and therefore to body health.

Grape-Nuts

FOOD

contains the whole nutriment of wheat and barley, including the mineral salts. The malting of the barley starts digestive processes and the 20-hour baking breaks down the starch cells. Grape-Nuts food digests in about one third of the time required by white bread.

17,000 GALLONS OF BEER

Run Into Kanawha River—Brewery Destroyed All Surplus Stock On Hand When State Goes Dry.

Parkersburg, W. Va.—To avoid paying the Federal tax a local brewery company had R. L. Hays, deputy internal revenue collector, supervise the destruction of 17,000 gallons of beer which had been left over when West Virginia went dry July 1.

The beer was run out of the vats into the Little Kanawha River. Under the prohibition law intoxicants can no longer be manufactured or sold in the State.

TWO DRINKS A DAY WHISKY LIMIT

That Is All a Man Can Take Care of, Says Expert.

New York.—Dr. Smith Ely Jelliffe, chemist, testifying yesterday at New Brunswick, New Jersey, in the contest over the will of James W. Sterry, New York drug merchant, declared that the human body can burn two ounces of alcohol daily, with a fair amount of impunity. "More than that amount will injure a man physically and mentally," said the expert, "the worst losses being to his mind. By two ounces, I mean two drinks of whisky with the average of three fingers to the glass. Whisky is about 50 per cent. alcohol. The minute a man begins to drink more he is subjecting his faculties and body to a strain they can not stand.

GOOD ROADS IN DOLLARS AND CENTS

What It Costs the United States to Improve Its Highways and What It Gets in Return.

Washington, D. C., July 18.—Approximately \$206,000,000 was spent last year on public roads in the United States, according to statistics prepared by the U. S. Department of Agriculture. In 1901 the total was only \$79,000,000. In nine years, therefore, the increase has been over 250 per cent.

This awakening on the part of the country to the importance of good roads has, experts say, been due in great measure to the principle of state aid to counties and other local communities. New Jersey began the movement in 1891 when it passed its State Highway Law. Massachusetts and Vermont followed a year later, but for the most part the other States were slow to move. In 1904 only fifteen had state highway departments; today there are only six that have not. In 1913 the individual States appropriated a total of \$38,755,088 to supplement local expenditures.

The value of this state aid is, however, not to be measured by the figures alone, for the bulk of the money comes, and always must come, from the counties and townships. Thus, in 1912, the cash outlay by counties, districts and townships, was \$137,493,985. Complete figures for 1913 are not yet available but it is safe to estimate the sum at approximately \$151,000,000. To this must be added some \$15,000,000 to represent the value of the labor contributed in kind of cash in districts where this practice prevails. Last year, therefore, local communities contributed, in round numbers, one hundred and sixty-six millions of dollars, as against appropriations from state treasuries of \$38,755,088. The true importance of this thirty-eight millions lies in the fact that it means expert supervision of the expenditure of a considerable portion of the vast sum of two hundred millions. When each county built as it chose and when it chose, the services of trained engineers were usually out of the question.

ASK INJUNCTION TO PREVENT GIRLS FROM DOING TANGO

Burlington, Iowa.—When the calliope on the excursion steamers play tango music the 200 girls employed at the Mississippi Pearl Button company refuse to work.

This is the basis for an injunction action filed by Blair Brothers to restrain calliope music on steamers during working hours. The plaintiffs also seek damages in the sum of \$500 for loss of the services of young women employees.

CHAMPION HERDS AT SHOW CIRCUIT

Over Four Thousand Dollars Offered In Premiums This Year

A BEAUTIFUL SILVER CUP

Short Horns, Herefords, Polled Durham and Aberdeen Angus Banner-Bearers Booked for Exhibition at Kentucky State Fair.

Superlatives regarding the class of beef cattle to be exhibited at the twelfth annual Kentucky State Fair will find justification in the specimens to be on hand for the greatest exhibit in the fair history of the state.

Over \$4,000 is offered in premiums, his year for beef cattle prize winners, and rich donations are listed from the American Short Horn, Hereford and Polled Durham Pedigree Record Associations.

A beautiful silver cup will be offered for the best state exhibit in each of the four leading breeds of beef cattle—Short Horns, Herefords, Polled Durham and Aberdeen Angus.

Prizes will also be offered for the best exhibit made by members of the baby Beef Cattle Clubs throughout the state. All the best herds that make the Show Circuit of 1914 are expected to appear at the Kentucky State Fair, Friday afternoon, September 18, a parade of the prize winners in all the beef cattle classes will take place in the five stock pavilion, the grand old animals decorated with brilliant ribbons indicating the awards they have won, showing in panorama the successful aggregate of the entire department.

PRETENTIOUS WILL BE POULTRY SHOW

The Finest Fowls and Prize Pigeons of Country-Famed Lofts Feature of Kentucky State Fair.

Articles galore have been written regarding the amazing advance of the hen to a position of dignity and recognized importance in the commerce of the world and an agricultural exhibition without this one-time highly regarded fowl would be as savories as "soup without salt" or as ineffectual as "a ship without a rudder."

And never has the value of the hen been more emphatically shown than in the importance of the poultry exhibit at a State or County Fair, and never will a Kentucky State Fair boast a greater or classier aggregation of fowls than the numerous breeds to go on exhibition at the twelfth annual Kentucky State Fair in September 14-19.

Over \$1,000 in premiums has been offered for poultry and pigeons, and every known variety recognized by the American Standard of Perfection is given a class in this show.

In addition to the classes for single birds there are premiums for breeding pens in all the most popular varieties. The prize classification has been arranged to suit the ideas of the pigeon fanciers both in and out of the state and as a whole is now big enough and broad enough to attract any pigeon loft or squab farm in the country.

Entries for the poultry show close September 4. Three beautiful trophies are offered as special prizes in this department, one being given by the Maywood Poultry Farm, one by the Kentucky State Poultry Association, and one by the publishers of the Industrial Hen.

WONDER WORKS OF WOMANKIND

To Be Exhibited In Lavish Array at the Kentucky State Fair—Winners Will Be Queens of Art, Needle and Culinary Realms.

Every art and craft known to the realms of femininity will be represented in the exhibition of handwork to be shown at the twelfth annual Kentucky State Fair September 14-19.

The premium list for 1914 has been greatly enlarged and augmented, and the result will doubtless be the most attractive showing in the history of the fair. The exhibition this year will be in charge of Mrs. Thomas Smith, president of the State Federation of Women's Clubs and she will be assisted by the latter in charge of the arts and crafts department. Linens, embroideries, art work, lace, infant's outfits, all lines of culinary work and miscellaneous products will have full showing this year and the competition for the handsome prizes will be spirited.

An award in this department means far more to the recipient than the monetary consideration, recording as it does the supremacy of the triumph of exhibitors over the most expert competitors in the entire state and preserving to posterity a proof of dexterity in either art, needle or culinary craft which is well worth striving for.

The Kentucky breeder of live stock can not bring his stock before the public attention better than by taking a premium at the Kentucky State Fair.

DYNAMITE FORTY-SIX YEARS AGO AND AT THE PRESENT TIME

Forty-six years ago today the first official test of dynamite in England was made. The hills around Merthyr shook beneath the mighty vibrations of a new explosive born to civilization. It has been discovered by Alfred Nobel of Sweden and its experimental tests made in the preceding year. Nobel created it to take the place of the untamed nitro glycerin which had appalled the world for several years with its grim tragedy.

The inventor had lost his father and brother when his nitroglycerin factory had blown up a few years before his discovery. His death toll was such that England, Belgium and Sweden for bade its manufacture. The world was aroused when, as a climax to its record a ship loaded with nitro glycerin, blew up in mid ocean while on its way from Europe to Chile, and the governments were on the point of prohibiting its use.

It was then that Nobel began his experiments toward taming nitro glycerin—and created dynamite, or "giant powder" as it was first called in the United States. In his world-wide propaganda to convince governments that dynamite was a safe explosive, the inventor came to America. It was while he was registered at a small hotel in New York that he casually explained to the hotel clerk that his satchel contained dynamite. The clerk firmly ordered Nobel to seek other quarters, and was relieved when he went out of the door.

Today dynamite is being manufactured in the United States at the rate of 250,000,000 pounds a year. Filling 5,000 freight cars, it is constantly being transported over the railroads of the country. Though it is the third most powerful explosive in general use, it has been found so that railroad companies receive it for transportation almost as readily as they do coal. Nitro glycerin, however, is still under the transportation ban in both the United States and Europe. Dynamite is today one of the most important factors in the progress of civilization. Without it the mighty engineering achievements—the Panama Canal, the mountain and river tunnels—could not be accomplished. It takes an important part in building the modern skyscrapers; it is used to mine the huge quantities of iron and other metals that enter into structures. It blasts out the millions of tons of coal that supply heat, light and power, and give life to the locomotives that bring food and clothing to the populace cities. It is helping to grow the food we eat—the modern, scientific farmer uses it to plow his land, its explosions shattering the sub-soil which no plow ever reaches. It is sold to increase the crops greatly in quality and by 50 per cent in quantity. Today dynamite is used to fight great conflagrations, to fight wars and to prepare for a large part of the progress of the world.

KENTUCKY LAW INVALID

Illinois Central Wins Contention Against 2 1/2 Cent Fare—Lack of Enacting Clause Makes Statute Futile.

Louisville, Ky., July 18.—The new law providing for a two and one-half cent passenger rate on all railroads in the State today was held invalid by Judge James P. Gregory, of the Jefferson Criminal Court. Judge Gregory has ruled his decision upon the failure of the recent Legislature to include an enacting clause.

The case was that of the Illinois Central railroad, in which the railroad was charged with violating the new maximum fare law. In handing down his decision Judge Gregory declared that the act as it now stands is merely a declaration on the part of the Legislature, and is not in compliance with the constitution, which specified the mandatory way in which an act shall read. He said that while the question had never been passed upon in Kentucky it had been legally decided in other States. All the trunk lines through the State had revised their passenger tariffs in order to conform with the law, which became effective about a month ago. It is not expected that many changes will be made in spite of the decision today.

DRANK POISON

Did Huntington Man When Police Were About to Arrest Him for Wife Murder.

Huntington, W. Va., July 18.—When a posse of citizens closed in to arrest him for the murder of his wife, Wilbur Gullion, aged 29, ran on to the Baltimore & Ohio trestle across the Guyan River tonight and drank a bottle of poison. He will die, doctor says. Gullion slew his wife earlier in the evening by slashing her throat with a razor.

President Bordas, of the Dominican Republic, has lost his grip on the situation in the island, and the Southern rebels besieging the capital are in a position to make their own terms.
